Day by day

■ DAY 1

Oslo, Norway

Arrive in Oslo and transfer to your centrally located hotel. Spend the day exploring this vibrant city at your own pace. Check in with the hospitality desk this afternoon to make final arrangements before your charter flight the following day.

◇ DAY 2

Oslo / Longyearbyen / Embark Ship

Depart Oslo on a charter flight and enjoy breathtaking vistas over icy fjords and the Barents Sea enroute to Longyearbyen. On arrival to this Arctic outpost, explore the world's northernmost settlement, which has morphed from a coal mining hub to a base for exploration and science in recent history. Witness daily life, and delve into this history, before embarking *National Geographic Resolution*, your base for the next fifteen days.

Meals included: breakfast, lunch, dinner

◇ DAYS 3-15

Exploring Svalbard, Greenland and Iceland

Your day-by-day itinerary, in keeping with the nature of an expedition, is a thoughtfully considered framework based on decades of experience in this dynamic Arctic region. Your team takes full advantage of an experienced captain, expedition leader and naturalists—as well as technological resources. Armed with the latest satellite imagery, they'll chart where the ice is impenetrable, and where there are leads guiding the ship to exciting discoveries. Your ship has an ice-strengthened hull and forward-searching sonar, plus agile Zodiacs and kayaks, allowing your expedition team to make forays among the icebergs. The undersea specialist deploys the ROV, bringing back imagery few, if any, have ever seen. And with unforgettable days in the ice and two photographers on board, guests have expert assistance to get their best photos ever.

Begin in Svalbard, Norway, a place of deep fjords, snowcapped mountains and massive ice sheets. Svalbard is one of the best places on the planet to see polar bears in their natural habitat—the sea ice. Venture to the foot of vast tidewater glaciers, kayak among sparkling icebergs, hike the tundra and explore fjords that split the coastline.

Svalbard's wonders are a prelude to days ahead of discoveries on unknown shores, following the ice's edge. Be on deck as your captain navigates between icebergs that drift from the calving glaciers. With a course set west, Jan Mayen is on the itinerary—an isolated volcanic island in the Arctic Ocean. Here, you'll discover the island's unique geology and black sand beaches and learn of the interesting history of Jan Mayen's past inhabitants. If the ice yields, the ship will aim for Scoresbysund on the east coast of Greenland, the longest fjord system in the world. If the ice is unrelenting, the ship will head to Iceland.

The finale of your journey is the west coast of Iceland: Ísafjarðardjúp, a microcosm of life in the Westfjords with islands and wildlife around every corner including Vigur Island, home to a centuries-old tradition of eider farming.

Meals included: breakfast, lunch, dinner

■ DAY 16

Reykjavík / Disembark Ship

Disembark in Reykjavík and transfer to the airport

for flights home.

Meals included: breakfast

The most advanced ice-class expedition ship afloat, the *National Geographic Endurance* offers unprecedented access to polar regions.

The first new polar build in Lindblad's 50-year history, *National Geographic Endurance* is named to honor explorer Ernest Shackleton and his legendary Transantarctic Expedition.

A fully-stabilized vessel of the highest ice class (PC5 Category A), she will enable adventurous guests to go where few have or can. Endurance's most striking exterior feature is her distinctive profile, the patented X-Bow®, a game-changing design that guarantees the smoothest, most comfortable ride in all kinds of conditions; and since it eliminates bow impact, a quieter ride, as well.

An equally impressive feature may well be her capacity: she carries just 138 guests, a commitment to expedition excellence over scale. Scandinavian-inflected, luxuriously appointed, her inviting interiors would be a destination in themselves. Because she is a Lindblad expedition ship, however, her attention is focused on the world outside —with acres of window glass to keep you connected to the stunning views beyond the pane, and a fleet of expedition tools to get you out exploring.

National Geographic Endurance and *National Geographic Resolution* are next-generation expedition ships, purpose-built for polar navigation. Fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessels, they are designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. The patented X-bow ® is key to their design; its powerful wave-slicing action provides an extremely smooth ride even in adverse conditions, and even reduces spray on deck for superior observation. They carry a full suite of expedition tools and offer a variety of experience-enhancing amenities.
